Pump & Controller Warranty Statement for Customers Outside the U.S./Canada

SunRotor® solar pumps and controllers are guaranteed to be free from defects in material and/or workmanship for a full year. This warranty shall begin on the date of the invoice from *SunRotor*® and will be subject to the following provisions:

Failure to follow correct installation, operating conditions, or care for the products in accordance with the instruction manual will void this warranty.

All *SunRotor*® pumps require that a low water sensor be installed. This and all other warranties will be null and void without its presence.

Please review the data sheets for your custom configuration and follow the depth limits listed on the pump curve chart. Exceeding listed depth limit can damage the pump and will void the warranty.

SunRotor® solar pumps are designed for pumping clean water containing **NO** solid particles.

SunRotor® is not responsible for the labor or other charges and/or expenses associated with the removal, transportation, or reinstallation of any defective product(s).

Pump warranty does not cover damages caused by or due to: the presence of sand or abrasive silt in the water source; salt water corrosion, mineral deposits, or electrolytic action; lightning, flooding, or other acts of nature; mishandling or other abusive conditions.

Pump Controller warranty does not cover damages caused by or due to: mishandling or abuse; failure to protect from weather exposure; failure to protect from overheating from sun exposure; failure to seal out insects, rodents, and other wildlife; lightning, flooding, or other acts of nature.

SunRotor® makes no expressed or implied warranty, and any implied warranty of merchantability/fitness for a particular purpose in excess of the foregoing warranty is hereby disclaimed by *SunRotor*®. *SunRotor*® also will not be liable for any consequential damages, losses, or expenses arising in connection with the use of or inability to use goods provided by *SunRotor*® for any purposes whatsoever, *SunRotor*®'s liability shall in no case exceed the original sales price of the good(s) claimed as defective.

In all cases it shall be the responsibility of the customer/pump installer to ensure a safe installation in compliance with local, state, and national electric codes.

SunRotor® shall have the sole and absolute authority in determining whether the failure was due to defective materials and/or workmanship.
